

BOULDER VALLEY SCHOOL DISTRICT

Welcome to the BVSD Enrollment Dashboard

This dashboard brings together data from multiple sources to illustrate the current status of BVSD's student enrollment data, as well as trends over time. This comprehensive set of visualizations has been developed to build understanding in order to guide decision making and to be transparent with our community about what is happening in BVSD related to student enrollment.

How to navigate this dashboard

Page Headers:

- Enrollment trend data: Pages with a dark blue header contain data from previous years.
- Current year data: Pages with a medium blue header contain data from the current school year.

Tabs:

Each tab contains multiple data visualizations. To see different visualizations, click on the three horizontal lines in the upper left corner and select from the options.

Naming Conventions:

School year is denoted by the year in which a school year began. For example, "2025 SY" refers to the school year beginning in Fall 2025 and ending in Spring 2026.

What can I find on this dashboard?

This dashboard includes annual trend data from several different data sources. This information provides context for the broader picture of enrollment in BVSD.

Tip: Close this message by clicking on the X in the upper right corner to view reports. Use the drop-down menu in the upper left to navigate between reports. Click the X on the upper left of the filter menu to close the menu.

Within this group of visualizations you will find:

- K-12 Enrollment: This chart shows the overall number of students enrolled in BVSD across multiple years.
- K-12 Enrollment in Special Programs: This chart shows the number of BVSD students in special programs across multiple years.
- Births: This visualization shows the number of children born within each BVSD school attendance area and region across multiple years.
- Elementary School Capacity/Utilization: This infographic is created by applying the criteria developed by the Long Range Advisory Committee to the enrollment projects developed by BVSD's Planning and Engineering staff.
- Inter-District Enrollments: This table shows how many students enroll to and from BVSD's neighboring districts, as well as net numbers, across multiple years.

What can I find on this dashboard?

The data on this dashboard shows the movement of students among all the schools in the district for each school, at each school level (elementary, middle, and high), regionally, and for the district overall. Select different data sets to view in the Filters menu.

Tip: Close this message by clicking on the X in the upper right corner to view reports. Use the drop-down menu in the upper left to navigate between reports. Click the X on the upper left of the filter menu to close the menu.

Within this group of visualizations you will find:

- District: This visualization shows historical enrollment numbers for each level (elementary, middle, high) overall and by geographic regions. Use the Filters menu to toggle between levels and regions.
- School: This visualization shows historical enrollment numbers for each school and level (elementary, middle, high). Use the Filters menu to toggle between schools, levels, and years.

What can I find on this dashboard?

This dashboard includes aggregated enrollment data from the BVSD student information system. These data provide historical and current snapshots of student enrollments into and out of the district.

Tip: Close this message by clicking on the X in the upper right corner to view reports. Use the drop-down menu in the upper left to navigate between reports. Click the X on the upper left of the filter menu to close the menu.

Within this group of visualizations you will find:

- Historical Year Over Year: This chart shows enrollment gains and losses for each month of the school year (September - May) for the past four years.
- Current Year: This visualization shows enrollment gains and losses for each month of the current school year and a net comparison with the previous three years.
- Student Groups: This chart shows enrollment gains and losses for different groups of students for the current year with a comparison to the previous three years.
- Withdrawals: This chart shows the four-year trend of reasons given by students for withdrawing from the school district ranked by frequency.

What can I find on this dashboard?

This dashboard includes CDE data on private and home school enrollments.

Tip: Close this message by clicking on the X in the upper right corner to view reports. Use the drop-down menu in the upper left to navigate between reports. Click the X on the upper left of the filter menu to close the menu.

Important Notes About Private School and Home Based Education Data

CDE Private School Data:

This data is self reported by the organization and there is no auditing process by CDE to verify enrollment.

- Data appears to be incomplete with missing years and/or schools.
- Not all attendees of a private school reside within BVSD boundaries.
- It is difficult to monitor when private schools open and close.

CDE Home Based Education Data:

- This data is self reported by individuals with no follow-up auditing by CDE to verify enrollment.
- There is a general consensus that not all families register with the state and missing numbers may be significant.
- CDE rules allow individuals to register in any school district in the state, not necessarily the one where they reside.

Use caution when interpreting.
