School Attendance Area Policy JC

Worksession

Policy Framework

- Updated February 2024
- Board has authority to set attendance area boundaries.
- Review attendance areas every 5 years
- Considerations for:
 - Compactness of boundaries
 - Student densities vs. school capacity
 - Balance enrollment between schools
 - Maximization of pedestrian access
 - Efficient use of transportation and facilities
 - Ability to provide programs
 - Fiscal responsibility
 - Changes to student populations
 - Residency criteria

JC

J STUDENTS

Adopted: February 26, 2019

Revised: February 12, 2024

School Attendance Areas

Attendance areas for each school of the School District shall be drawn up by the administration and approved by the Board. The Board shall review such areas at least every five (5) years and more frequently if modifications are required.

A student's designated attendance area shall be based on the legal residence of the parents/guardians. Where a property straddles a boundary line separating two schools, the property shall be considered within the school boundary that contains the point where the property driveway accesses the public right-of-way.

In establishing school boundaries, consideration shall be given to the compactness of the areas, the densities of students in an area in relation to the relative capacities of the schools, the equalization of enrollments between schools, the maximization of pedestrian access to schools, and efficient use of transportation and facilities.

Modification of attendance area boundaries may be made to address issues including new property construction, changes to student populations, the ability of schools to provide programs, and fiscal responsibility.

When it is determined that changes to boundaries are necessary, planning will include considerations for impacted schools and families.

Any changes to attendance area boundaries shall only be implemented following completion of the school year and prior to the opening of the subsequent school year.

LEGAL REF.:

C.R.S. 22-32-110(1)(m) (power to fix attendance areas)

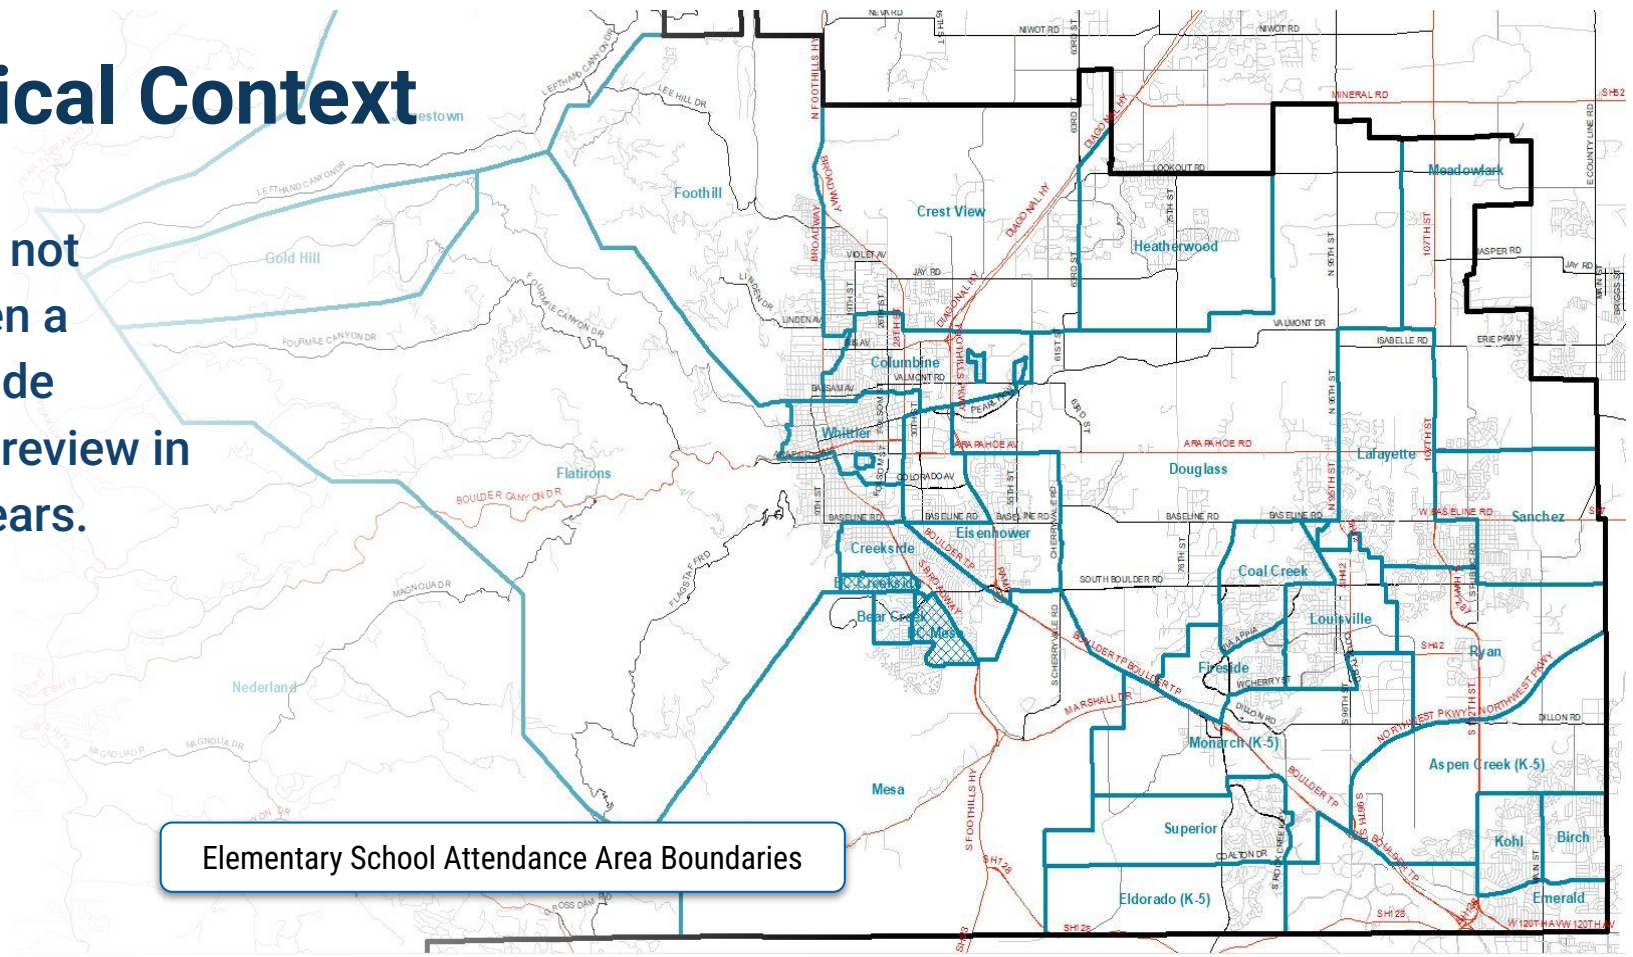

Limitations of Changing Boundaries

- Can only redistribute base resident populations, not overall enrollment
- Other factors affect enrollment too, such as
 - open enrollment
 - program options
 - community values
- Disruptive to families and neighborhoods (e.g. siblings, home purchases)
- Unintended consequences (e.g. community division, transportation impacts)
- Transitional concessions may reduce effectiveness initially
- Not a precise tool for addressing inequities
- Stakeholder dissatisfaction

Historical Context

BVSD has not undertaken a district-wide boundary review in over 40 years.

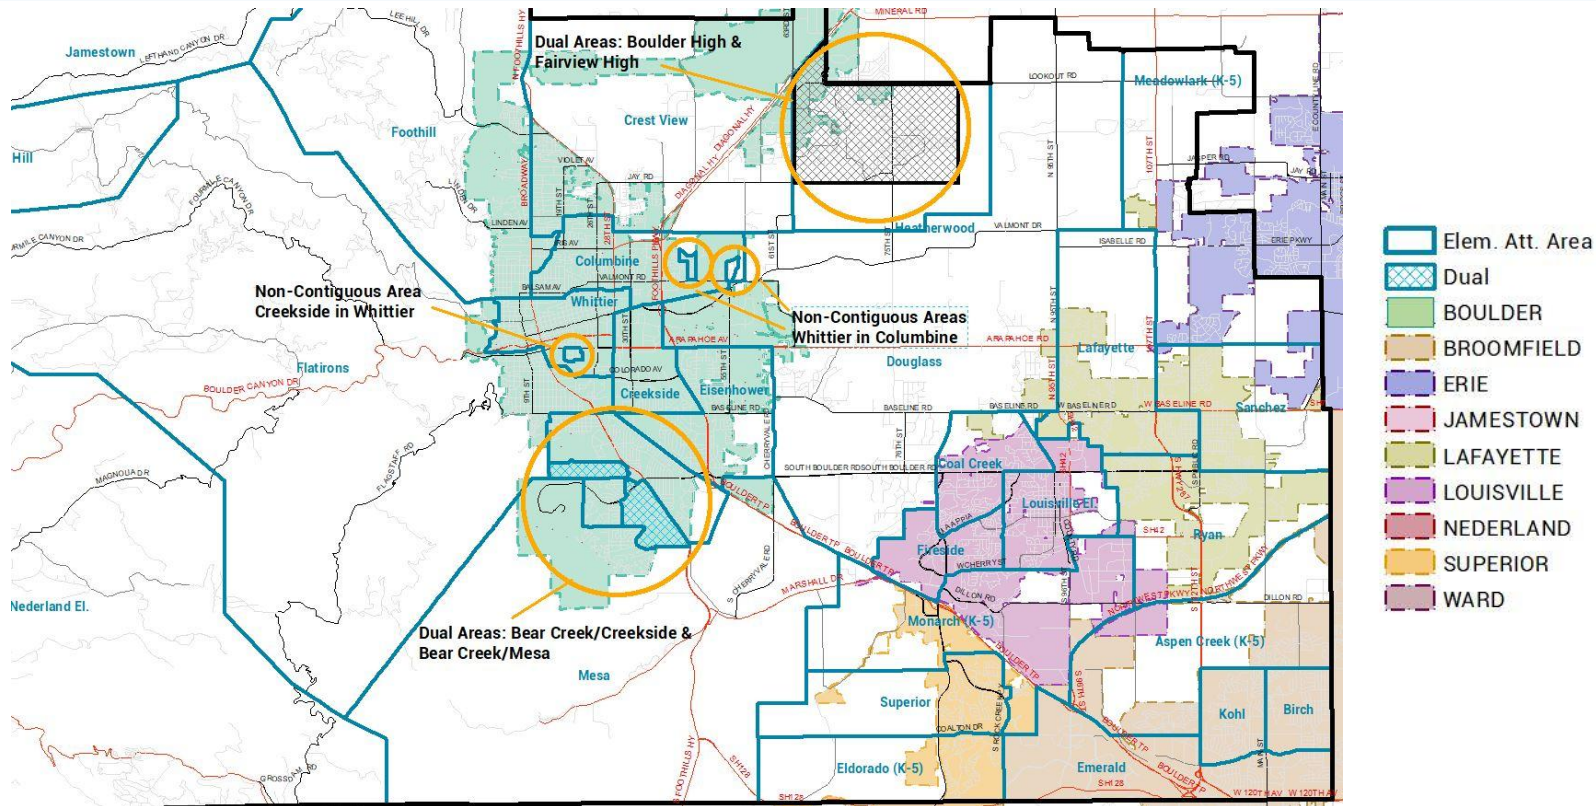

Observations

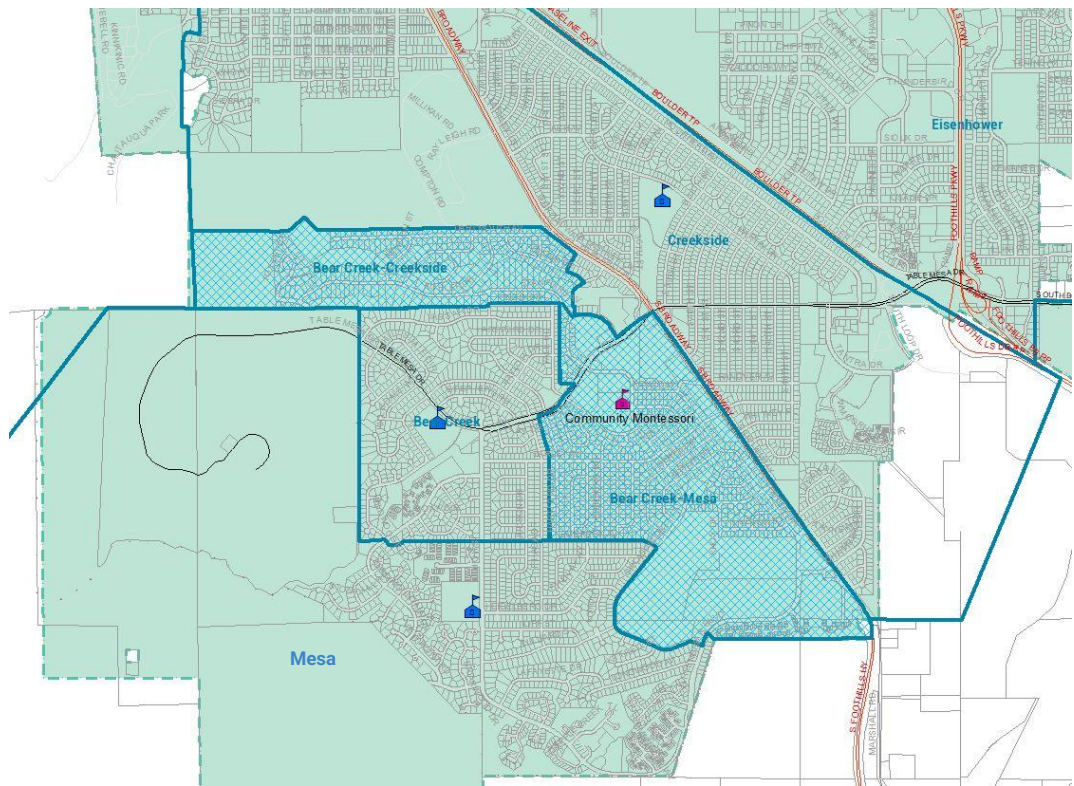

- Non-contiguous areas
- Dual enrollment areas
- Split feeders
- Elementary schools with fewer than 300 resident students

BVSD Boundary Detail Areas

Elementary Dual Enrollment Areas

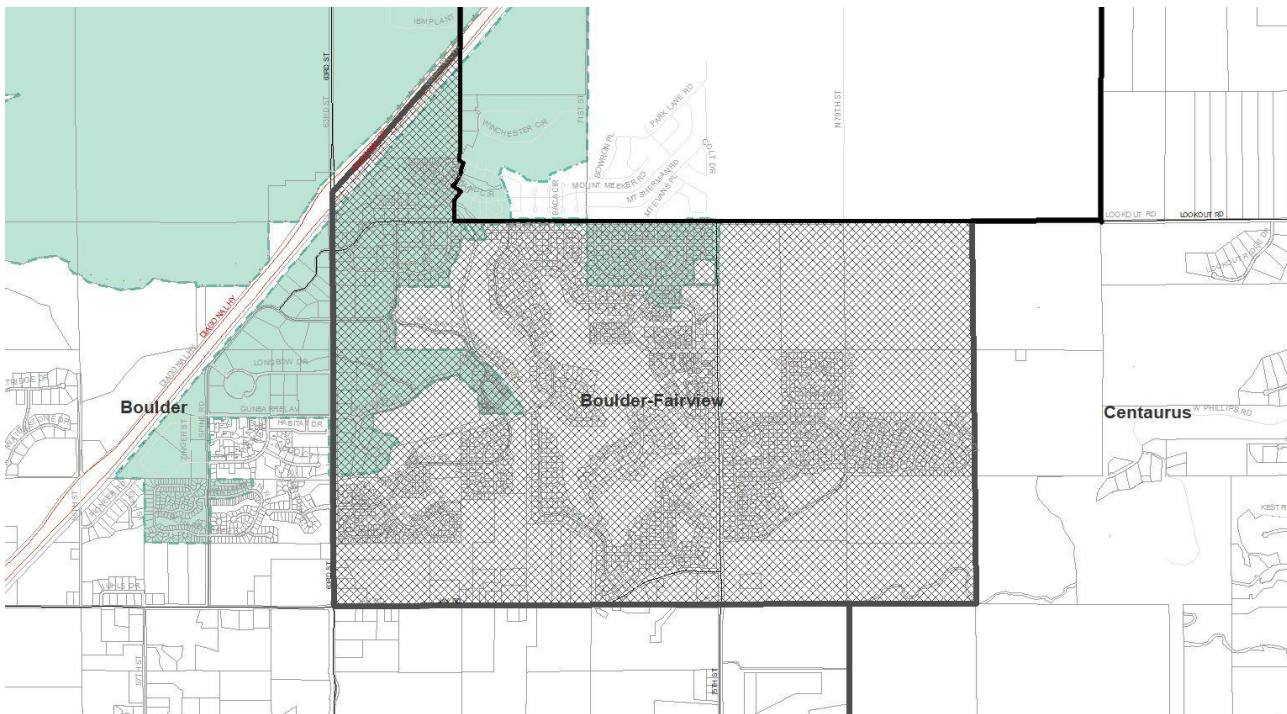

Bear Creek/Creekside

- 35 K-5 Students
- 22 attg. Bear Creek
- 7 attg. Creekside
- 1 attg. Montessori
- 5 attg. Other Schools

Bear Creek/Mesa

- 143 K-5 Students
- 76 attg. Bear Creek
- 36 attg. Mesa
- 16 attg. Montessori
- 15 attg. Other Schools

High School Dual Enrollment Area

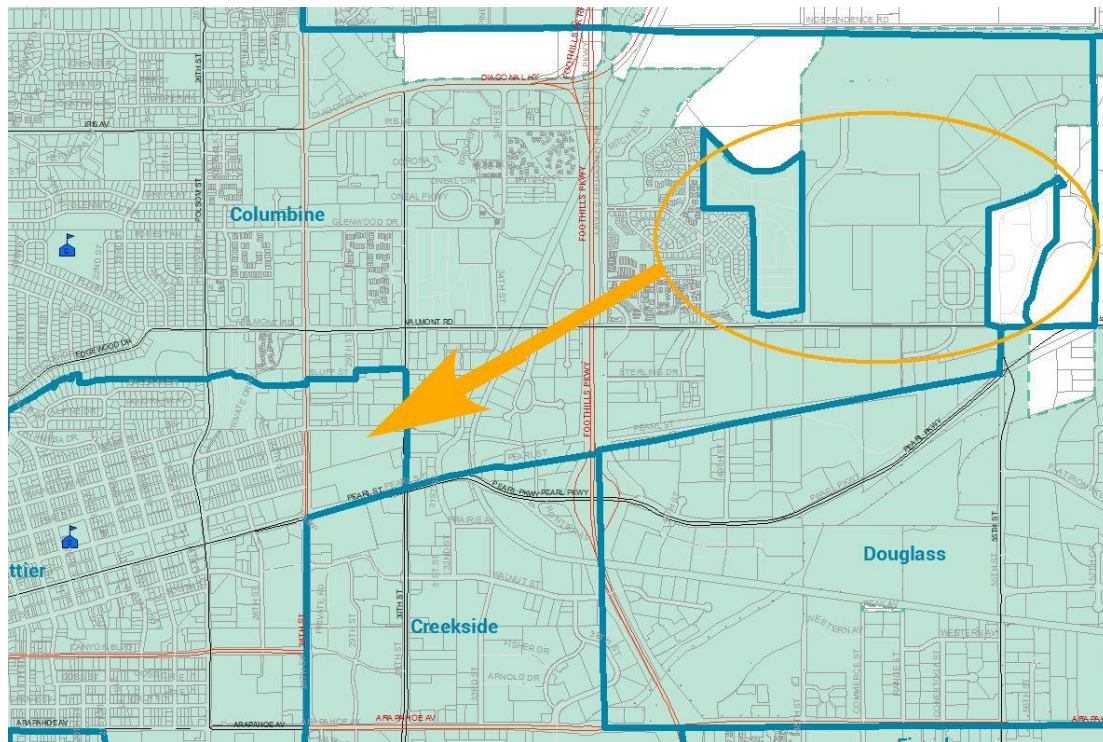

Boulder/Fairview

- 257 H.S. Students
- 86 attg. Boulder High
- 129 attg. Fairview
- 42 attg. Other Schools

Note: This is a non-contiguous area for Fairview.

Non-Contiguous Areas - Whittier/Columbine

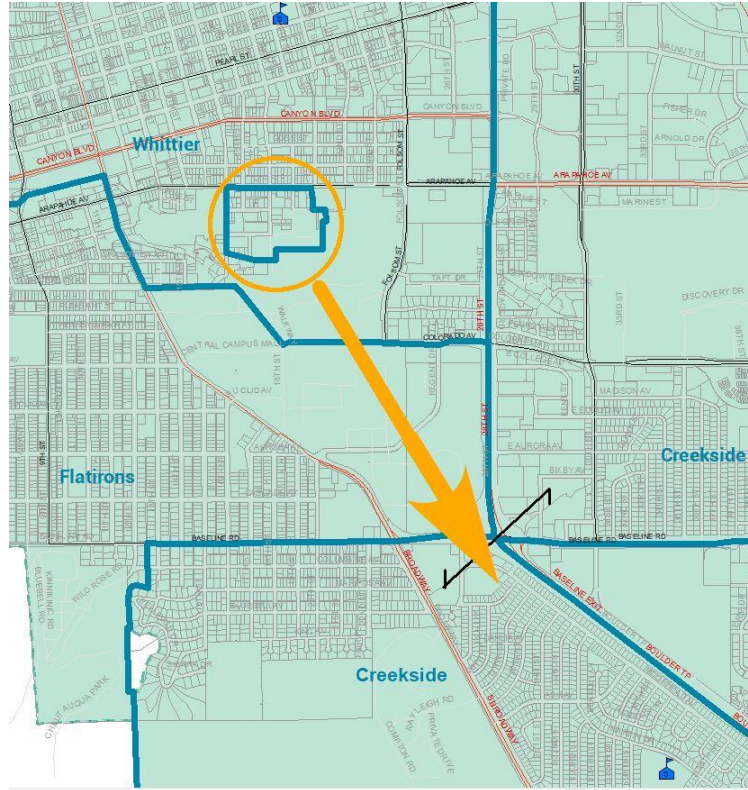

School of Attendance

	Total	Whittier	Columbine	Other*
2024	113	56	11	46
2023	118	66	9	43
2022	115	64	9	42
2021	117	61	12	44
2020	115	62	12	41
2019	120	74	6	40
2018	133	78	9	46

*significant % attend Uni. Hill

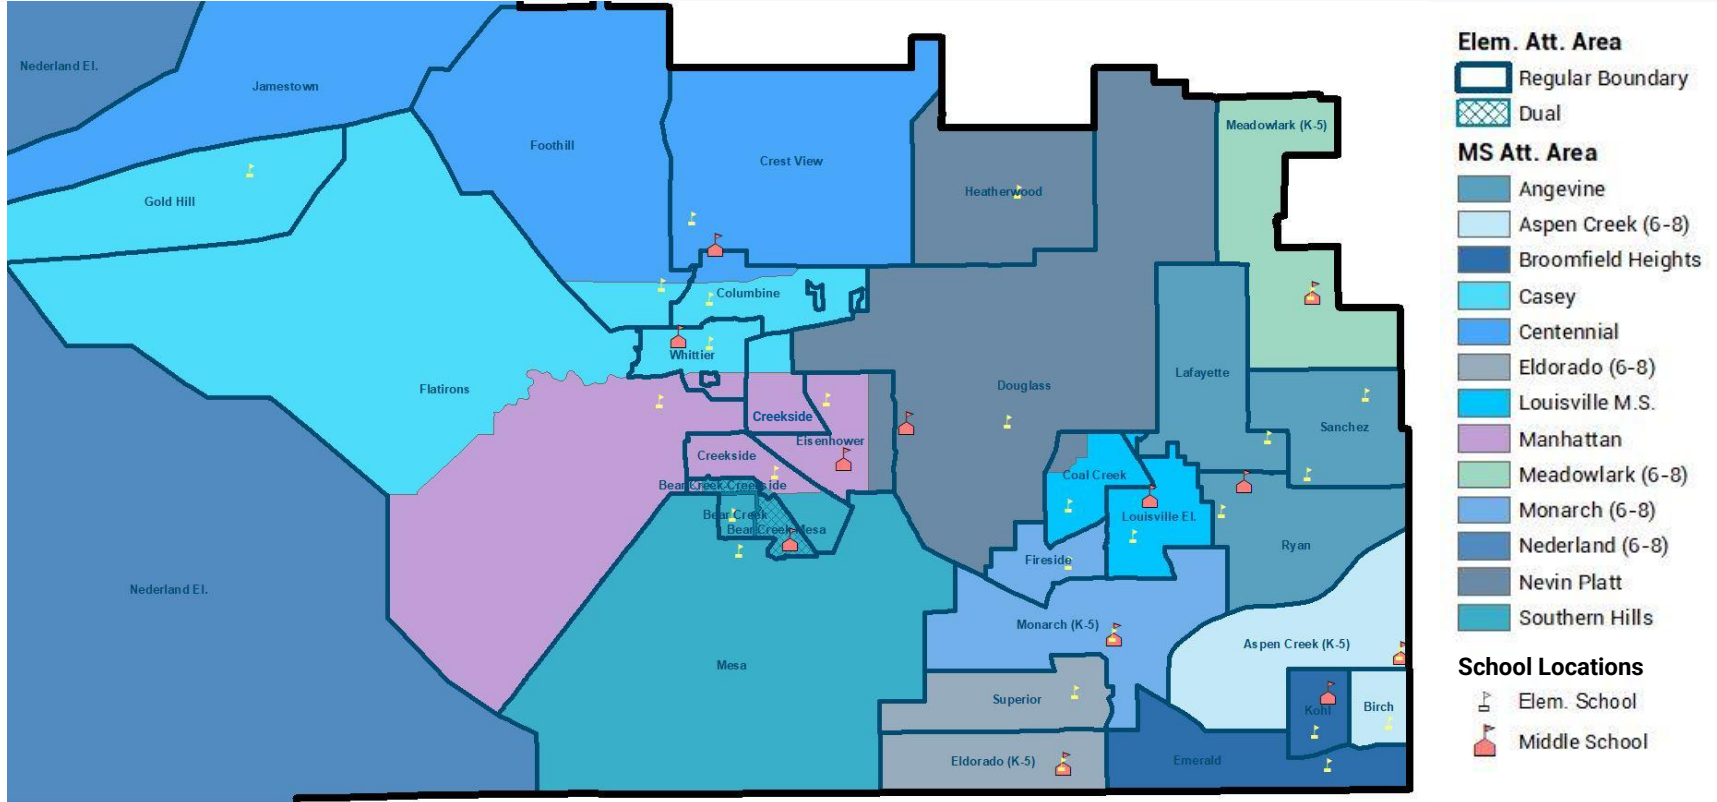

Non-Contiguous Areas - Whittier/Creekside

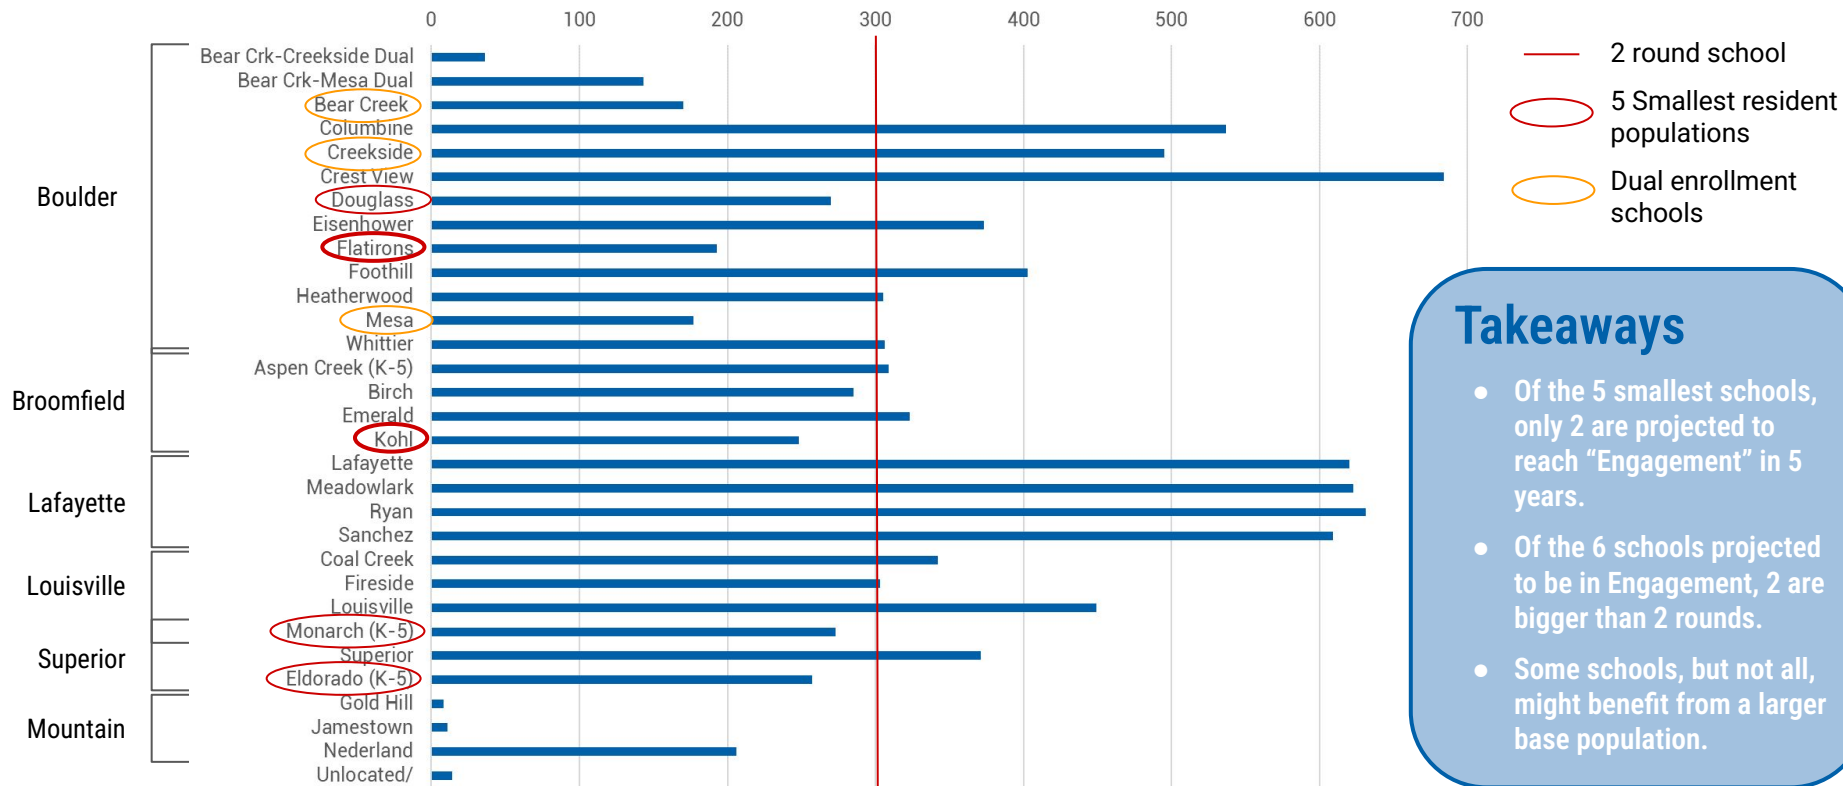

School of Attendance

	Total	Creekside	Whittier	Other
2024	6	2	0	4
2023	13	8	0	5
2022	18	13	0	5
2021	18	12	0	6
2020	25	14	1	10
2019	26	18	1	7
2018	18	13	1	4

Elementary to Middle Feeder Schools

Number of Resident Students per Elem. School

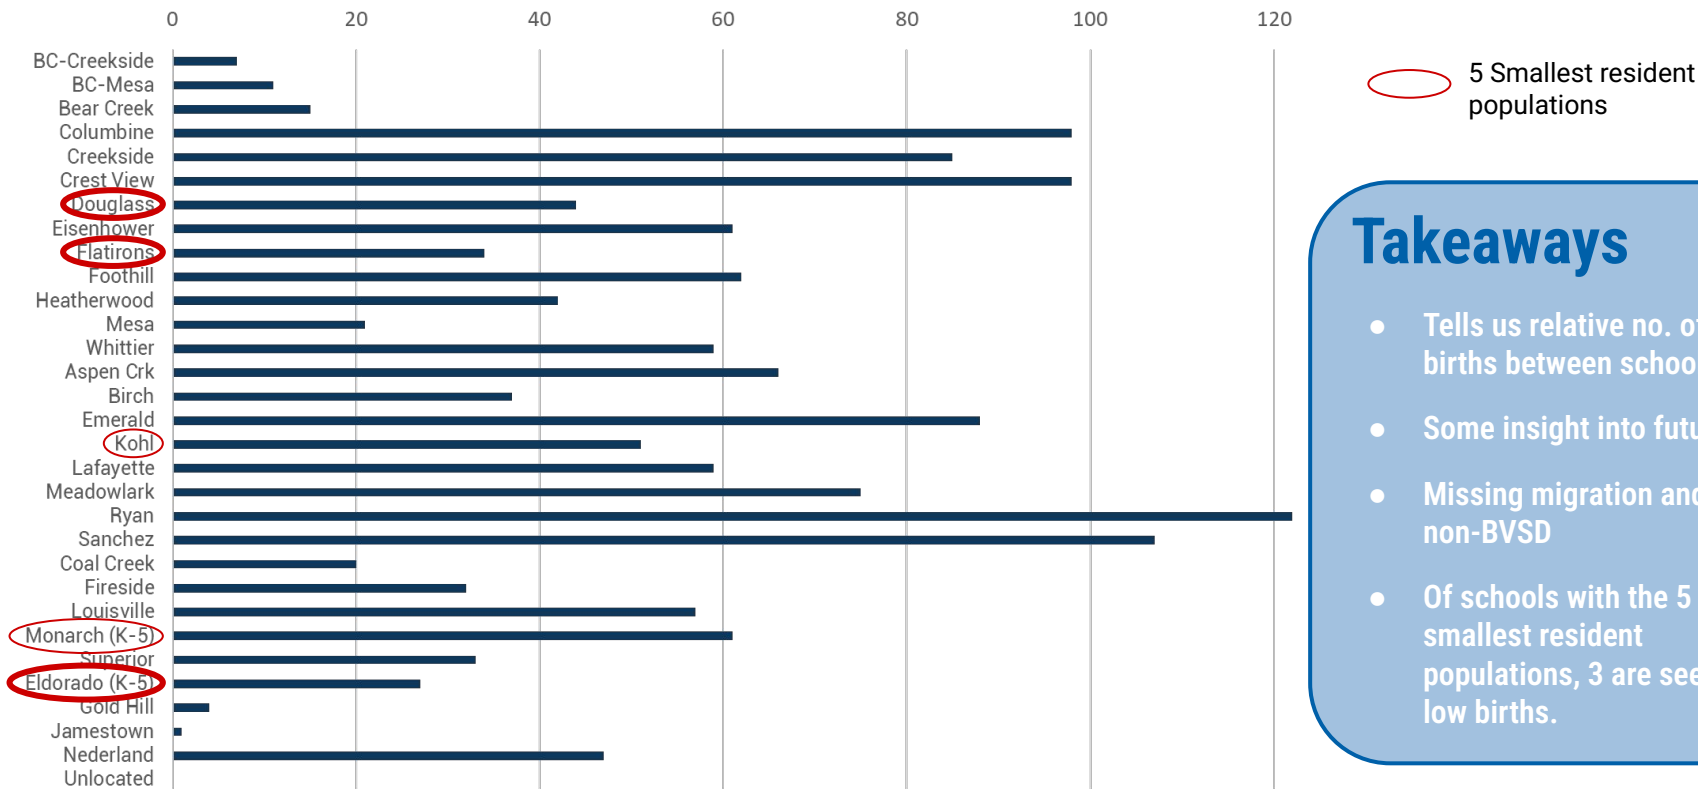

Takeaways

- Of the 5 smallest schools, only 2 are projected to reach “Engagement” in 5 years.
- Of the 6 schools projected to be in Engagement, 2 are bigger than 2 rounds.
- Some schools, but not all, might benefit from a larger base population.

Births per Elem. Attendance Area

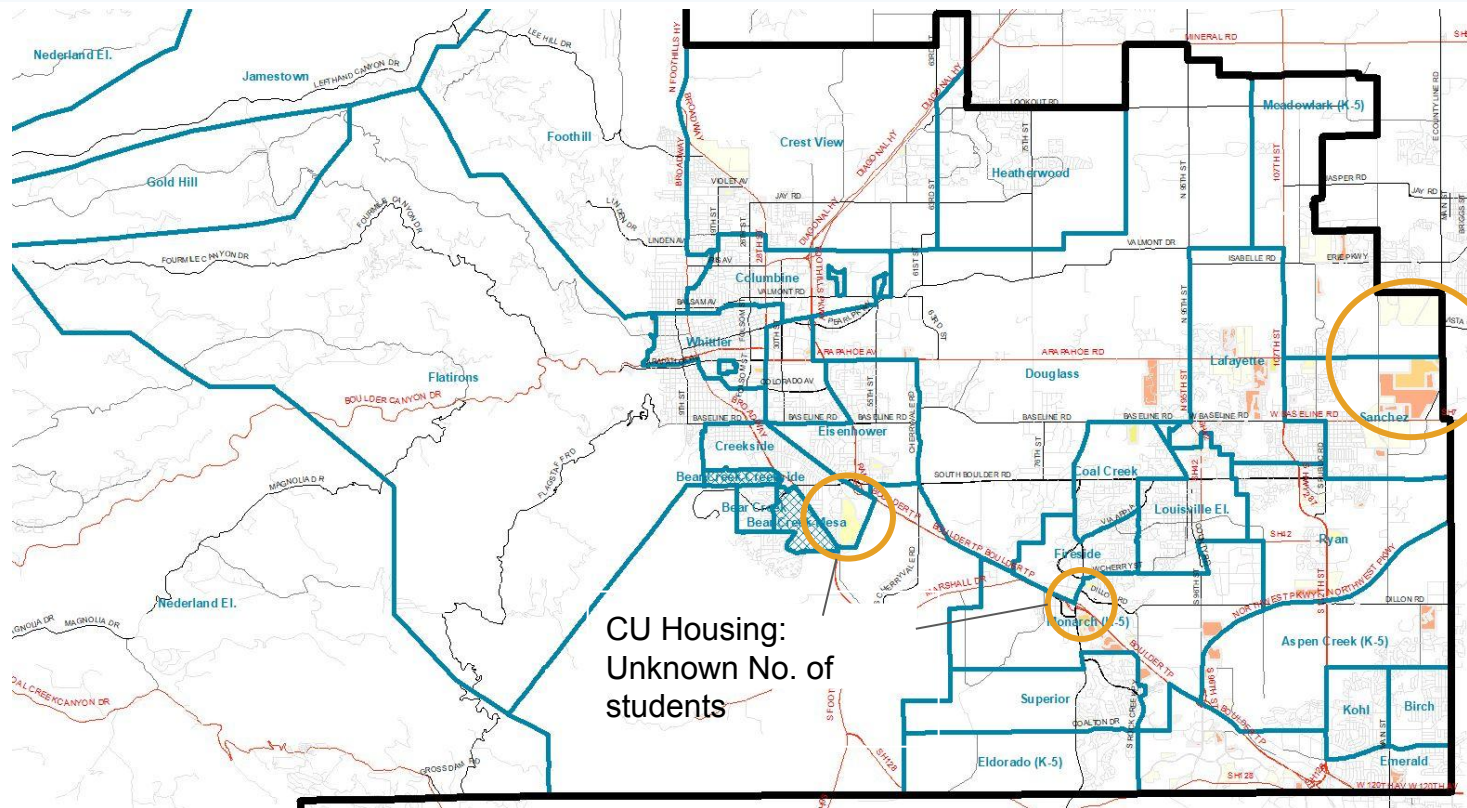

Takeaways

- Tells us relative no. of births between schools
- Some insight into future K
- Missing migration and non-BVSD
- Of schools with the 5 smallest resident populations, 3 are seeing low births.

Future Residential Development

Parkdale and
future residential
development

Summary

Observations

- Non-contiguous areas
- Dual enrollment areas
- Split feeders
- Elementary schools with fewer than 300 resident students

Policy JC

- Compactness of boundaries
- Student densities vs. school capacity
- Balance enrollment between schools
- Maximization of pedestrian access
- Efficient use of transportation and facilities
- Ability to provide programs
- Fiscal responsibility
- Changes to student populations
- Residency criteria
