

The deck's ranges imply different retention shares for different components

share of the sending school's projected students that the deck's range implies land at the receiving school(s)
 Source: deck pp. 25, 37, 48, 51, 54 (post-change ranges); Feb 2026 report p. 9 (standalone projections). Share
 = (range end – receivers' standalone projections) ÷ sending school's standalone projection.
